

d On-screen trial sequence (CenterOutTask, three categories)

Target positions reshuffle every trial (DrawTrialLayout.m):

○ hold window ■ bar stimulus ● colour cue ● category target ● cursor

fixate (HOLD) $\rightarrow$ bar (BAR) $\rightarrow$ colour cue, active rule reminder (CUE) $\rightarrow$ targets appear, leaves centre (DECISION_TIME) and moves to target (MOVEMENT) $\rightarrow$ hold in target, feedback (TARGET_HOLD, REWARD/SUCCESS_FB or ERROR_FB) $\rightarrow$ inter-trial interval (ITI). Durations are shipped defaults (ConfigOrgParams.m); STIM_DELAY/CUE_DELAY (working-memory manipulation) default to 0 s and are skipped on a standard trial.
